

# Posit RStudio Cloud

Nic Schwab

2023-03-20

## Sign up for Posit account

If the RStudio server seems to break there is a backup plan. You can sign up for an Posit Cloud account [here](#).

You'll get 25 hours of computing time free each month, which should be enough to complete course work with.

## Installing the libraries

You'll have to type some code to make Posit cloud seem like our RStudio workbench. Run the following lines of code in the console.

```
install.packages("mosaic")
install.packages("openintro")
install.packages("tinytex")
install.packages("remotes")
remotes::install_git("https://github.com/Nics-Github/MTH142Rtutorials")
```

Select 3 to install no updates.

You should be all set to do coursework as we do in class.
